

ATF FLUID

Automatic Transmission Fluid

Description

Sloan Automatic Transmission Fluid meet general motors Dexron II and for Mercon requirements, it is made from highly refined base stock combined with the most successful technology of viscosity index improver, anti-oxidant, extreme pressure friction modifier, anti-foam and pour point depressant additives. This unique formulation makes it an automatic transmission fluid, with quality reserve.

Operational Benefits

- * Single product for all types of automatic transmission
- * Super wear protection
- * Longer retention of frictional characteristics under service operation conditions
- * Smoother shift in transmission

Applications

Sloan Automatic Transmission Fluid is recommended for automatic transmission in passenger cars, light trucks and power steering systems. It is also suitable for power shift transmission and hydraulic systems on farm tractors and heavy equipment. It meets or exceeds the requirement of General Motors Dexron II, Ford Mercon, D.B.236.6, Allison C-4 & CAT T02, Sperry Vicker, Denison and Sundstrand.

Properties

Sloan Automatic Transmission fluid contains extreme pressure additive that protects the gear in automatic transmissions against wear. The antioxidants resist the formation of oxidation products, which can form lacquer and deposits and result in sluggish performance in transmission shift. Superior viscosity index does not shear-off due to severe operating condition and maintains temperature, viscosity relationship. Friction modifier maintains the required frictional characteristics.

Technical Data

<u>Characteristics</u>	<u>Method</u>	<u>Method</u>
Appearance	Visual	Bright & Clear
Colour	ASTM D-1500	Bright Red
Specific Gravity 60.60 °F	ASTM D-1298	0.878
Viscosity, CST	ASTM D-445	
@ 40 °C		37.4
@ 100 °C		7.26
Viscosity Index		162
Pour Point, °C		-39
Flash Point COC, °C		198
