

SYNTHOLUBE-220 EP

Description

SYNTHOLUBE-220 EP Synthetic gear lubricant is heavy duty, extreme pressure, it is compounded using a synthetic base stock, which has a high viscosity index and exceptionally low pour point. This lubricant contains extreme pressure additives, as well as rust, oxidation and corrosion inhibitors to protect gears and bearings operated under a wide variety of load conditions. The high and temperature performance of this product exceed conventional 80W-140 hypoid lubricants. Synthetic generally demonstrate superiority in one or more measures of performance when compared to conventional mineral oils of the same weight or viscosity.

Operational Benefits

- * Syntholube-220 EP results in longer gear life by providing extremely high film strength and superior low-temperature performance.
- * It also has anti-rust and anti-corrosion properties to further promote extended gear and bearing life.
- * It also exhibits excellent demulsibility and shear stability.
- * Extended drain
- * Reduced maintenance and downtime

Applications

Syntholube –220 EP Synthetic gear lubricant is recommended for application where heat and wear present major problems. It is for use spur, helical, herringbone, bevel, and most types of industrial hypoid gearing. It is also suitable for ball, roller and other types of anti-friction bearings. Its application also include manual transmission where EP type lubricants are recommended, differentials including limited slip and transfer cases for heavy equipment, trucks, tractors and industrial gear drives. Automobiles, high-duty truck and farm machinery are other potential uses of Syntholube-220 EP gear lubricant.

Technical Data

<u>Characteristic</u>	<u>Value</u>
ISO Viscosity Grade	220
Kinematic Viscosity, cSt.	
100°C	33.3
40°C	234
Viscosity Index	200
Flash Point, °C	290
Pour Point, °C	-33
