

## SYNTHOLUBE-460 EP

### Description

Syntholube-460 EP Synthetic gear lubricant is heavy duty, extreme pressure, compounded using a polyalkylene glycol synthetic base stock, which has a high viscosity index and exceptionally low pour point. Reinforced with rust, oxidation and corrosion inhibitors to protect gears and bearings operated under a wide variety of load conditions.

### Operational Benefits

- \* Syntholube-460 EP results in longer gear life by providing extremely high film strength and superior low-temperature performance.
- \* It also has anti-rust and anti-corrosion properties to further promote extended gear and bearing life.
- \* It also exhibits excellent demulsibility and shear stability.
- \* Extended drain
- \* Reduced maintenance and downtime

### Applications

Syntholube-460 EP Synthetic gear lubricant is recommended for application where heat and wear present major problems. It is for use spur, helical, herringbone, bevel, and most types of industrial hypoid gearing. It is also suitable for ball, roller and other types of anti-friction bearings. Its application also include manual transmission where EP type lubricants are recommended, differentials including limited slip and transfer cases for heavy equipment, trucks, tractors and industrial gear drives. Automobiles, high-duty truck and farm machinery are other potential uses of Syntholube-460 EP gear lubricant.

### Technical Data

<u>Characteristic</u>	<u>Value</u>
ISOVG Grade	460
Viscosity, cSt @ 40 °C	460
@ 100 °C	40.4
Viscosity Index	181
Flash Point, °C	242
Pour Point, °C	-35
